DETAILED ACTION

1. Claims 18, 20-23, and 32-34 are pending. Claims 18 and 20 have been amended in this communication filed 9/16/09 entered as Response After Non-Final Action.
2. The IDS filed 7/01/09 has been considered and entered.
3. The 35 USC 112, First Paragraph Rejection for claims 18, 20, 21-23, and 32-34 has been overcome by Applicants' amendments and convincing arguments.
4. The 35 USC 112, Second Paragraph Rejections for claims 18, 20, 21-23, and 32-34 have been overcome by Applicants' amendments and are hereby withdrawn.

Allowable Subject Matter

Claims 18, 20-23, and 32-34 are allowed.

The following is an Examiner's statement of reasons: The best prior art of record, Persidsky discloses a pen computer with a display screen and a pressure sensor in the tip of the pen and a motion sensor with output signals describing the motion of the pen so that hand written data can be acquired without a special writing surface. Persidsky did not disclose a system programmed to translate an identified application and pen identities into an alias identity, send the alias identity and interaction data to the identified application with the information being addressed to the alias identity, and forward the information from the application to the user via the alias identity.

Wakatsuki et al. discloses a pen scanner type bar code reader that reads a bar code and outputs a corresponding code data unit. Wakatsuki et al. did not disclose a system

programmed to translate an identified application and pen identities into an alias identity, send the alias identity and interaction data to the identified application with the information being addressed to the alias identity, and forward the information from the application to the user via the alias identity.

Lewis et al. discloses a self-contained pen computer that is capable of acquiring data representative of written strokes of the stylus of the pen and recognizing symbols associated with the pen strokes with the recognized symbols or pen strokes stored in a memory contained in the pen and transmitted via a transmitter to a host computer.

Lewis et al. did not disclose a system programmed to translate an identified application and pen identities into an alias identity, send the alias identity and interaction data to the identified application with the information being addressed to the alias identity, and forward the information from the application to the user via the alias identity.

"A.T. Cross Company Cardiff Software as Exclusive Supplier of Forms Software for CrossPad Portable Digital Notepad" discloses the Award-Winning CrossPad Notepad that captures handwritten notes and allows users to upload the information as electronic pages to a PC for printing and archiving and adds Cardiff's new Teleform Digital Ink Module where users will be able to complete up to 100 paper forms using the CrossPad, which stores the handprint as digital ink in memory. "A.T. Cross Company Cardiff Software as Exclusive Supplier of Forms Software for CrossPad Portable Digital Notepad" did not disclose a system programmed to translate an identified application and pen identities into an alias identity, send the alias identity and interaction data to the

identified application with the information being addressed to the alias identity, and forward the information from the application to the user via the alias identity.

Chiu, P.; Kapuskar, A.; Reitmeier, S. and Wilcox, L. discloses NoteLook that is a client-server system designed and built to support multimedia not-taking in meetings with digital video and ink. Chiu, P.; Kapuskar, A.; Reitmeier, S. and Wilcox, L. did not disclose a system programmed to translate an identified application and pen identities into an alias identity, send the alias identity and interaction data to the identified application with the information being addressed to the alias identity, and forward the information from the application to the user via the alias identity.

An extensive search of the applicable prior art was done but showed no better references.

Pertinent Prior Art: Shriver (US 5,548,092) and Knee et al. (US 5,994,710).

For these reasons claim 18 is deemed to be allowable over the prior art of record and claims 20-23 and 32-34 are allowed by dependency.

It appears that the instant invention is beyond the skill of one of ordinary art.

Accordingly the invention would NOT have been obvious because one of ordinary skill could not have been expected to achieve it, NOR would they have been able to predict the results, and as such, they would have no capability of expecting success.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ella Colbert whose telephone number is 571-272-6741. The examiner can normally be reached on Flexible Schedule.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Trammell James can be reached on 571-272-6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
